10. Closing assessment

SNID Nov in Kohat Division met 4 of 7 headline checks. Reach is a solid platform, but the monitoring evidence shows that verified quality has not yet been achieved uniformly.

Reach	Quality gaps	Actions	Direction
98.5%	3	10	Verify and close

Final message for leadership: converting reported reach into consistently verified, operationally sound quality is the objective for the next round.

Annex: Monitoring-to-action framework

Monitoring is valuable only when a finding changes field action. Each signal should lead to a response, an owner and evidence of closure, reviewed at the next ERM.

Monitoring signal	Interpretation	Required response
Team-missed child or house (NT)	Preventable operational miss	Same-day revisit; route-map and micro-plan review; training focus
High NA or child-away	Timing and revisit problem	Timed revisit plan with supervisor verification
Carrier handling or cold-chain gap	Practice weakness	Immediate on-job demonstration and re-check
AIC without support logistics	Supervisory readiness failure	Equip before deployment; verify at morning start
Low ICM recall despite high coverage	Quality concern behind reported coverage	Targeted sweep and independent re-monitoring

Abrupt refusal change	Possible improved disclosure or integrity signal	Household verification and refusal line-list review

Annex: Quality-improvement focus for the next round

Domain	This round	Next-round focus
Reach	Coverage 98.5%	Protect access and catch-up gains
Missed children	9,869 still missed	Household-specific revisit and conversion
Verification	ICM recall 91.7%	Targeted independent monitoring in weak UCs
Team quality	104 NT children; 293 TVBMC	On-job coaching; same-day corrections
Supervision	AIC and team indicators reviewed	Logistics readiness and checklist discipline
