- Re-train and supervise teams in UCs with recall below 90% (Anjani).
- Re-visit NT houses in Anjani, Zakhtan and review team micro-plans there.
- Check finger-marking and tally accuracy in TVBMC UCs (Arghunja, Kool, Anjani).
- Fix AIC gaps: Microplan updated; Checklist completed; Supervisor supported teams.
- Fix team gaps through supportive supervision: Teams with a female member; Teams with a government accountable member.

Annex: Monitoring-to-action framework

Monitoring is valuable only when a finding changes field action. Each signal should lead to a response, an owner and evidence of closure, reviewed at the next ERM.

Monitoring signal	Interpretation	Required response
Team-missed child or house (NT)	Preventable operational miss	Same-day revisit; route-map and micro-plan review; training focus
High NA or child-away	Timing and revisit problem	Timed revisit plan with supervisor verification
Carrier handling or cold-chain gap	Practice weakness	Immediate on-job demonstration and re-check
AIC without support logistics	Supervisory readiness failure	Equip before deployment; verify at morning start
Low ICM recall despite high coverage	Quality concern behind reported coverage	Targeted sweep and independent re-monitoring
Abrupt refusal change	Possible improved disclosure or integrity signal	Household verification and refusal line-list review
